## **Comparative Resume Generation using Multiple LLMs**

Prepared by:  
Jhohn Bennidict Estrella  
Bachelor of Science in Computer Science  
21st Century IT Skills | CS2A

Submitted to:  
Sir. Gabriel I. Quibod

2st Semester  
AY 2025-2026

April 12, 2026

## Section 1 – Prompt: Enhanced by ChatGPT

Create a clean, modern, one-page professional resume based on the details below.

### Candidate Information:

- Name: Jhohn Bennidict Ociones Estrella
- Email: jboestrella@addu.edu.ph
- Phone: 09928461674

### Education:

- Bachelor of Science in Computer Science (2nd Year Student)

### Skills:

- Programming Languages: C, C++, C#, Java, Python
- Web Development: React, Next.js, TypeScript, JavaScript, Tailwind CSS
- Database: MySQL, MongoDB

### Projects:

For each project, EXPAND the description into 2–3 strong bullet points that:

- Clearly explain the purpose of the system/application
- Highlight key features and functionalities
- Emphasize technologies used and your contributions
- Use action-oriented language (e.g., “Developed,” “Designed,” “Implemented”)

### Projects List:

#### 1. Student Information System

Tools: MySQL, Java

Description: A system to manage student data efficiently.

#### 2. Para! A Jeepney Route Tracker App

Tools: MySQL, Java

Description: An app to track jeepney routes effectively.

#### 3. Task Manager

Tools: Next.js, MongoDB

Description: An app to organize and track tasks effectively.

### Formatting & Style:

- Keep the resume strictly ONE PAGE
- Use clear section headings: Summary (optional), Education, Skills, Projects
- Use bullet points for readability

- Maintain a professional, concise, and results-oriented tone
- Avoid unnecessary fluff or overly generic statements
- Ensure consistent formatting and alignment

Optional Enhancements:

- Add a short 2–3 sentence professional summary tailored for an entry-level Computer Science student
- Highlight technical strengths and career focus

Output:

- Provide the resume in clean, well-formatted text (ready to copy into Word/Google Docs)
- Ensure it is ATS-friendly (simple formatting, no tables or graphics)

## Section 2 – LLM Outputs

### Output #1: Gemini Pro

Jhohn Bennidict Ociones Estrella

jboestrella@addu.edu.ph | 09928461674

---

#### Professional Summary

Motivated second-year Computer Science student with a strong foundation in software development, web technologies, and database management. Passionate about building practical, user-centric applications and eager to leverage skills in Java, Python, and modern web frameworks like Next.js. Fast learner dedicated to writing clean, efficient code and solving complex technical challenges in a collaborative environment.

#### Education

##### Bachelor of Science in Computer Science

*Currently in 2nd Year*

#### Technical Skills

- **Programming Languages:** C, C++, C#, Java, Python
- **Web Development:** React, Next.js, TypeScript, JavaScript, Tailwind CSS
- **Database Management:** MySQL, MongoDB

#### Projects

##### Student Information System | *Java, MySQL*

- Developed a comprehensive database management system designed to streamline the storage, retrieval, and updating of academic records.
- Implemented secure CRUD (Create, Read, Update, Delete) functionalities using Java and JDBC, ensuring data integrity and efficient query processing.
- Designed an intuitive user interface to facilitate easy navigation for administrators managing sensitive student and faculty data.

##### Para! A Jeepney Route Tracker App | *Java, MySQL*

- Engineered a localized transit tracking application aimed at assisting commuters in navigating complex public utility jeepney routes effectively.
- Integrated a MySQL relational database to map, store, and seamlessly query extensive route coordinates, designated stops, and fare matrices.
- Programmed the core application architecture in Java, focusing on reliable data synchronization, intuitive route matching, and user-friendly interaction.

##### Task Manager | *Next.js, MongoDB*

- Built a modern, responsive web application enabling users to seamlessly organize, prioritize, and track daily tasks and long-term projects.
- Leveraged Next.js for robust routing and server-side rendering, delivering a fast, highly optimized user experience across all devices.
- Configured a MongoDB backend for flexible, document-based data storage, allowing users to efficiently categorize tasks, set deadlines, and monitor completion statuses in real time.

## Output #2: Grok Expert

**JHONN BENNIDICT OCIONES ESTRELLA**

jboestrella@addu.edu.ph | 09928461674

### PROFESSIONAL SUMMARY

Motivated 2nd-year Computer Science student with a solid foundation in programming, web development, and database systems. Experienced in building functional applications that solve real-world problems through clean code and efficient data management. Seeking an internship or entry-level opportunity to apply technical skills in software development and contribute to impactful projects.

### EDUCATION

Bachelor of Science in Computer Science

Ateneo de Davao University

2nd Year Student

### Technical Skills

- **Programming Languages:** C, C++, C#, Java, Python
- **Web Development:** React, Next.js, TypeScript, JavaScript, Tailwind CSS
- **Database Management:** MySQL, MongoDB

### PROJECTS

#### Student Information System

Java, MySQL

- Developed a full-featured Student Information System to efficiently manage enrollment, academic records, grades, and personal data for administrative users.
- Implemented complete CRUD operations and secure database queries with MySQL to ensure fast, accurate storage, retrieval, and updates of student information.
- Designed backend logic in Java to support search, filtering, and reporting features, streamlining data management and reducing manual administrative workload.

#### Para! – Jeepney Route Tracker App

Java, MySQL

- Built "Para!", a mobile-friendly Jeepney Route Tracker application to help commuters locate, track, and navigate real-time jeepney routes in Davao City.
- Integrated MySQL database for storing and managing route schedules, locations, and updates, enabling dynamic search and accurate route recommendations.
- Implemented user-centric features including route filtering and tracking functionality using Java, improving accessibility and efficiency of public transportation.

#### Task Manager

Next.js, MongoDB

- Developed a responsive full-stack Task Manager web application to help users organize, prioritize, assign, and track personal and team tasks effectively.
- Built backend data persistence with MongoDB and frontend interface with Next.js to support real-time task creation, status updates, deadlines, and progress monitoring.
- Designed an intuitive UI with modern web technologies to deliver seamless user experience, enhancing productivity through clean task management workflows.

# Final Resume:

**JHONN BENNIDICT OCIONES ESTRELLA**

jboestrella@addu.edu.ph | 09928461674

---

## Professional Summary

Motivated second-year Computer Science student with a strong foundation in software development, web technologies, and database management. Passionate about building practical, user-centric applications and eager to leverage skills in Java, Python, and modern web frameworks like Next.js. Seeking an internship or entry-level opportunity to apply technical skills in software development and contribute to impactful projects.

## EDUCATION

Bachelor of Science in Computer Science  
Ateneo de Davao University  
2nd Year Student

## SKILLS

Programming Languages: C, C++, C#, Java, Python  
Web Development: React, Next.js, TypeScript, JavaScript, Tailwind CSS  
Databases: MySQL, MongoDB

## PROJECTS

### Student Information System | *Java, MySQL*

- Developed a full-featured Student Information System to efficiently manage enrollment, academic records, grades, and personal data for administrative users.
- Implemented complete CRUD operations and secure database queries with MySQL to ensure fast, accurate storage, retrieval, and updates of student information.

- Designed an intuitive UI with modern web technologies to deliver seamless user experience, enhancing productivity through clean task management workflows.

### Section 3 – Comparison Table

|                                   | <b>Gemini Pro</b>                                                                                         | <b>Grok Expert</b>                                                                                                                                    |
|-----------------------------------|-----------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Content Completeness</b>       | Covers all required sections with accurate information but slightly more general in project descriptions. | Includes all sections with more detailed and context-rich descriptions (e.g., real-world applications like enrollment systems and Davao City routes). |
| <b>Formatting &amp; Structure</b> | Clean, minimal, and highly readable; well-suited for ATS due to simple and balanced layout.               | Strong visual structure with emphasized headings and clearer separation, but slightly denser.                                                         |
| <b>Professional Tone</b>          | Neutral, polished, and formal; appropriate for standard professional applications.                        | More assertive and results-oriented; highlights impact (e.g., improving efficiency, reducing workload).                                               |
| <b>Clarity &amp; Conciseness:</b> | More concise and easy to scan; uses shorter and direct bullet points.                                     | Clear but more detailed and slightly wordier; sacrifices brevity for depth.                                                                           |
| <b>Creativity / Enhancement</b>   | Safe and structured; enhancements are present but somewhat generic.                                       | More engaging and realistic; includes contextual details and stronger action-oriented descriptions.                                                   |
| <b>Overall Strength</b>           | Best for clarity, simplicity, and ATS-friendly formatting.                                                | Best for depth, impact, and stronger presentation of skills and projects.                                                                             |

## **Section 4 – Reflection**

Between the two LLMs, Grok Expert performed better overall because it produced a more detailed, impactful, and realistic resume. While Gemini Pro generated a clean and well-structured output, Grok Expert stood out by adding context to the projects and emphasizing real-world applications. For example, it included specific details such as “Davao City” and highlighted how the systems improved efficiency, making the resume feel more aligned with actual industry expectations.

The main differences I observed were in depth and tone. Gemini Pro focused on clarity and conciseness, using shorter and more straightforward bullet points. In contrast, Grok Expert used a more assertive and results-oriented tone, with richer descriptions and stronger action verbs. However, this also made Grok’s output slightly more wordy compared to Gemini’s concise style.

In my final resume, I combined the strengths of both outputs. I retained the clean and ATS-friendly structure from Gemini Pro while incorporating Grok Expert’s detailed descriptions and impactful wording. I simply copied the best components from both resumes to balance clarity and depth, ensuring the resume remained readable while still highlighting my skills and contributions effectively.

From this activity, I learned that prompting plays a crucial role in shaping the quality of AI-generated content. A well-structured and specific prompt leads to more refined and useful outputs. Additionally, I realized that different LLMs have unique strengths, and the best results often come from combining their outputs rather than relying on just one.
